PROFESSIONAL SUMMARY

MCA student (CGPA 8.2) with hands-on experience building full-stack web applications using the **MERN stack (MongoDB, Express.js, React, Node.js)**. Skilled in designing RESTful APIs, implementing JWT-based authentication, and building responsive, production-ready frontends. Also experienced in Java/Spring Boot backend development. Seeking a fresher Full Stack Developer role to build scalable, user-focused web applications.

TECHNICAL SKILLS

Frontend: React, Tailwind CSS, HTML5, CSS3, JavaScript (ES6)

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Spring Boot (Java)

Databases: MongoDB, MySQL

Languages: JavaScript, Java, Python, C, SQL

Tools & Platforms: Git, GitHub, CI/CD, Postman, VS Code

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems

WORK EXPERIENCE

Machine Learning Intern — Syslog Technology, Bengaluru | Mar 2024 – Jun 2024

- Developed an AI-assisted vehicle system with real-time object detection and obstacle avoidance using **Python, OpenCV, and TensorFlow**, following Agile sprint cycles.
- Performed end-to-end data preprocessing, model evaluation, and performance tuning, improving detection accuracy and system responsiveness.
- Integrated trained ML model with embedded systems for practical testing and automation, collaborating with senior engineers in an Agile environment.

PROJECTS

Eco Route | Node.js, Express, React, Tailwind CSS, MongoDB | GitHub

- Built a full-stack **MERN** web application providing eco-friendly route recommendations by integrating real-time air quality data, EV charging station locations, and CO_2 impact metrics.
- Engineered secure **JWT-based authentication**, personalized route planning, and dynamic dashboards using **React and Tailwind CSS**.
- Designed scalable **RESTful backend services** with **Express.js** for route optimization and data aggregation, ensuring seamless frontend-backend integration.
- Submitted a technical paper on the AI-based eco-friendly route recommendation system to **KSCT**.

Ayur Health Hub | Node.js, MongoDB, React | GitHub

- Built a full-stack **MERN** Ayurvedic healthcare app with patient management, consultation booking, dynamic symptom–disease mapping, and real-time health score tracking.
- Designed a scalable **Node.js + Express + MongoDB** backend with role-based admin controls, end-to-end testing, and automated data seeding.

EDUCATION

Master of Computer Applications (MCA) — K. S. Institute of Technology, Bengaluru

Graduated: July 2026 | CGPA: 8.2 | Coursework: DSA, Machine Learning, Big Data Analytics, Software Engineering, OOP with Java, DBMS

Bachelor of Computer Applications (BCA) — Surana College, Bengaluru

Graduated: July 2024 | CGPA: 7.51 | Coursework: C, C++, Python, DBMS, OS, Computer Networks, Web Technologies

ACHIEVEMENTS

- **Research Paper:** Submitted an AI-based eco-friendly route recommendation paper to KSCT.
- **Languages:** English, Kannada, Telugu, Hindi, Tamil
