PROFESSIONAL SUMMARY

MCA student (CGPA 8.2) with hands-on experience in full-stack web development and machine learning and strong hands-on skills in **Java, Spring Boot, React, and MySQL**. Built production-grade full-stack applications and ML systems.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, SQL, NOSQL.

Frameworks: Spring Boot, React, Hibernate / JPA, Node.js.

Web & APIs: REST APIs, HTML, CSS.

Databases: MySQL, MongoDB.

Tools & Platforms: Git, GitHub, CI/CD, Postman, Maven.

CS Fundamentals: OOP, DBMS, Operating Systems.

WORK EXPERIENCE

Machine Learning Intern — Syslog Technology, Bengaluru | Mar 2024 – Jun 2024

- Developed an AI-assisted vehicle system with real-time object detection and obstacle avoidance using **Python, OpenCV, and TensorFlow**, following Agile sprint cycles.
- Performed end-to-end data preprocessing, model evaluation, and performance tuning, improving detection accuracy and system responsiveness.
- Integrated trained ML model with embedded hardware for live testing, collaborating with senior engineers and documenting outcomes per SDLC standards.

PROJECTS

Banking Management System | Java, Spring Boot, React, MySQL, JPA/Hibernate | GitHub

- Built a full-stack banking application with account management, deposits, withdrawals, and fund transfers using a **Spring Boot REST API** and **React** frontend.
- Designed robust backend with **JPA/Hibernate ORM** for database operations, CORS-enabled endpoints, transaction validation, and proper error handling.
- Implemented detailed transaction history tracking with type classification (Deposit, Withdraw, Transfer) and concurrent-safe balance verification using **MySQL**.

Journal App | Spring Boot, MongoDB, React, JWT | JournalFlow.

- Developed a secure full-stack journal application with **JWT-based authentication, BCrypt encryption**, and role-based access control.
- Built scalable **Spring Boot MVC** backend with MongoDB integration, RESTful APIs, and comprehensive error handling — demonstrating OOP and clean architecture principles.

EDUCATION

Master of Computer Applications (MCA) — K. S. Institute of Technology, Bengaluru

Graduated: July 2026 | CGPA: 8.2 | Coursework: DSA, Machine Learning, Big Data Analytics, Software Engineering, OOP with Java, DBMS

Bachelor of Computer Applications (BCA) — Surana College, Bengaluru

Graduated: July 2024 | CGPA: 7.51 | Coursework: C, C++, Python, DBMS, OS, Computer Networks, Web Technologies

ACHIEVEMENTS

- **Research Paper:** Submitted an AI-based eco-friendly route recommendation paper to KSCT.
- **Languages:** English, Kannada, Telugu, Hindi, Tamil
